Who changed the labels?

A rival robot has swapped some labels in your training data. Count, suspect, spend your few trusted checks, and find out whether your sorter learned the right rule.

HOW A ROUND GOES

1. Poison: flip up to four tags in secret.
2. Audit: spend four tokens to check labels.
3. Deploy: lock the rule and score eight new cargo.

INSIDE

- 96 training cards in four decks
- 8 test cards
- 3 truth cards
- 16 reference cards
- 3 rule cards
- Score card and 2 quick references
- 2 role cards
- 27 fold-over STORE/RECYCLE tags
- 4 audit tokens
- 12-page rulebook

2 PLAYERS · TARGET 15–20 MIN

Draft 0.1 prototype. Rules, budgets and playing time are working hypotheses that playtests have not yet confirmed. github.com/haydn-s/poisoned-dataset-game · Apache 2.0

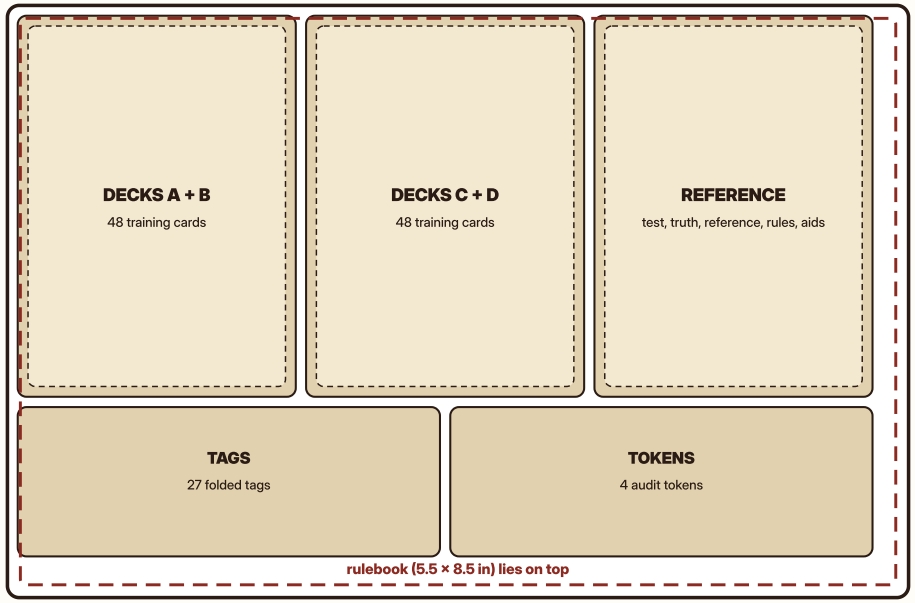

1.5 in deep

cut — fold (valley: printed side out) — bleed 0.125 in beyond the cut

flat 11.750 × 8.750 in · print at 100% on 11 × 17 in

Packing plan and box specification

Telescoping two-piece box. Everything fits in one layer under the rulebook.

Dimensions

Base (tray)	8.75 × 5.75 × 1.5 in outer	flat 11.750 × 8.750 in
Lid	8.812 × 5.812 × 1.5 in, 0.0625 in over the base	flat 11.812 × 8.812 in
Card wells	three 2.7 × 3.7 in	poker cards 2.5 × 3.5 in, sleeve room
Rulebook	5.5 × 8.5 in, 12 pages, saddle-stitched	lies flat over the wells
Bleed / safe	0.125 in bleed; keep text 0.125 in inside folds	glue tabs 0.5 in

Before production

- Print the dielines on 11 × 17 in cardstock at 100%, score the folds, and fit the real kit before choosing final dimensions.
- Board thickness changes the clearance: rigid box board needs about 0.1 in more than cardstock.
- Confirm the supplier's own template, bleed, safe area, proof process, price and delivery date against the November 23 deadline before ordering.
- Unused truth and reference cards go back face down in the reference well between rounds.
